Green (Sirun) Wang

UC Berkeley | greenw@berkeley.edu

I am an undergraduate at UC Berkeley studying political economy and applied mathematics. I study how institutions organize collective production and shape how people understand the sources of its success.

Education

University of California, Berkeley

Undergraduate | Political Economy & Applied Mathematics

Research interests

Political economy of institutions; Productive and interpretive capacity; Belief formation and formal theory

Academic training

My coursework includes quantitative microeconomics, probability, and mathematics, alongside political economy, world history, and Chinese literary history. This fall, I am taking courses in formal models of political science and the economic institutions of capitalism, with course papers planned in both.

In progress - Fall 2026

POLSCI 232B: Formal Models of Political Science

PHDBA 279PD: The Economic Institutions of Capitalism in Historical Perspective

ECON 141: Econometrics (Quantitative)

MATH 104: Introduction to Analysis

Selected completed coursework

ECON 101A: Microeconomics (Quantitative) (Spring 2026)

STAT 134: Concepts of Probability (Summer 2026)

MATH 53: Multivariable Calculus (Fall 2025)

MATH 55: Discrete Mathematics (Summer 2026)

MATH 54: Linear Algebra and Differential Equations (Summer 2026)

POLECON 100: Classical Theories of Political Economy (Spring 2026)

CHINESE 230: Seminar in Chinese Literary History (Spring 2026)

GLOBAL 45: Survey of World History (Spring 2026)

SOCIOL 127: Development and Globalization (Spring 2026)
